

Experience the future of precision manufacturing.

In our unique, software-driven factories, we produce high-precision components for the most demanding industries. Our production platform grows with every requirement: scalable, traceable, fail-safe.

We're happy to support you from prototype to series production and look forward to becoming your one-stop shop.

Milling & Turning

We manufacture highly precise 5-axis milled and turn/milled parts using new machines from Hermle, WFL and DMG MORI.

Quality Assurance

Using CMMs from Zeiss and Bruker Alicona, we can measure extremely tight tolerances and surface finishes.

Materials

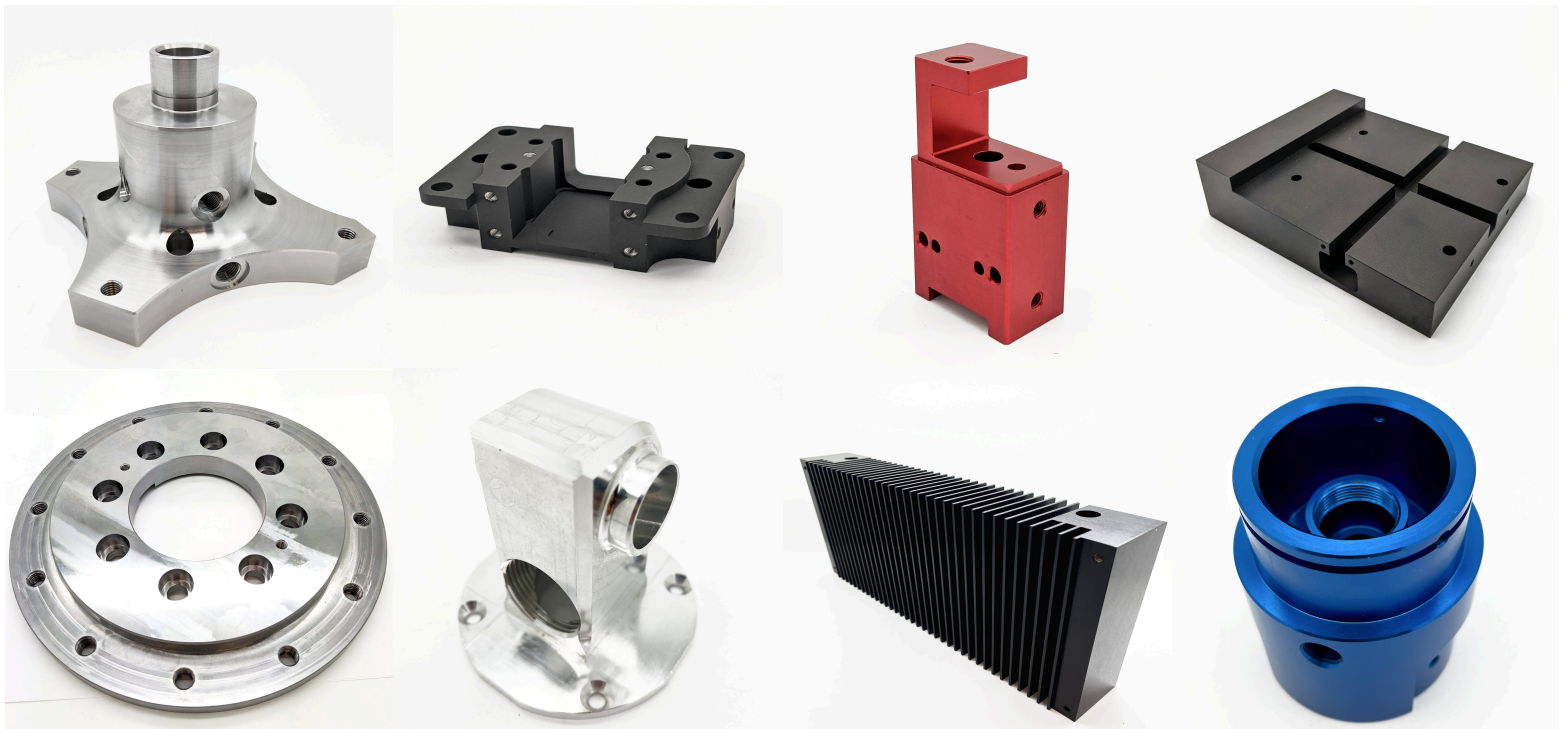

We machine all common materials and special alloys, and re-stamp 3.1-certified materials.

Surfaces

With audited partners, we offer all common surface treatments.

Trust >150 customers from:

- ✓ Medical
- ✓ Aerospace
- ✓ Defense
- ✓ Automation
- ✓ Pharmaceuticals
- ✓ Energy

Future-proof your supply chain with the most advanced precision factories.

Scalable Capacity

We can ramp our software-driven production capacities rapidly and grow with your demand which lets you consolidate suppliers and prevent supply bottlenecks. We are already growing faster than every other machine shop in Europe.

Digital Quality Data

We capture all measurement data generated during the production process digitally. You get access to all data and measurement strategies and can move directly from goods receipt to assembly.

Real-Time Tracking

You can digitally track the current progress of all your placed orders in real time, letting you monitor your supply chain to the minute.
