

ELEMENT

PROFESSIONAL
SOLUTIONS

CNC

Welcome,

We invite you to cooperate with our company.

ZS ELEMENT company exists from 2016. It started its activity with layout changes and electrical connections. With the passing of time, we expanded our business, including machining, electrical discharge machining (EDM), welding, and locksmithing.

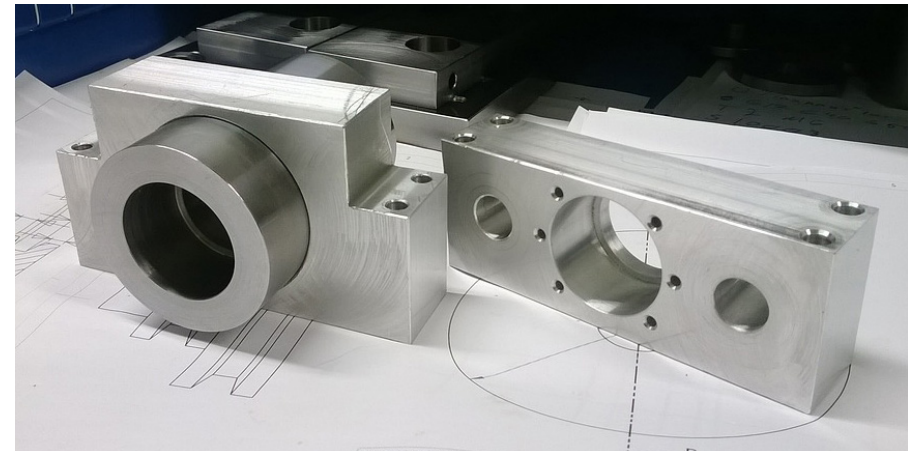

Materials processed by us: constructional steels, stainless steels, cast iron, non-ferrous metals, plastics.

We have our own design studio to meet the various needs of our customers. We also perform orders based on customer documentation.

We willing take up new challenges and create modern solutions.

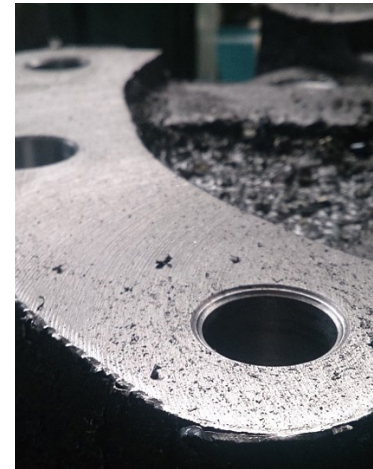

Comprehensive machining:

- making machine parts,
- making prototypes,
- small series manufacturing,
- medium series production,
- making injection molds,
- making blanking dies and cutting tools,
- making dies and assembly overall dimensions,
- making electrodes,
- making tools for plastic forming,
- making spare parts,
- making subassemblies and entire systems.

Welding and locksmithing:

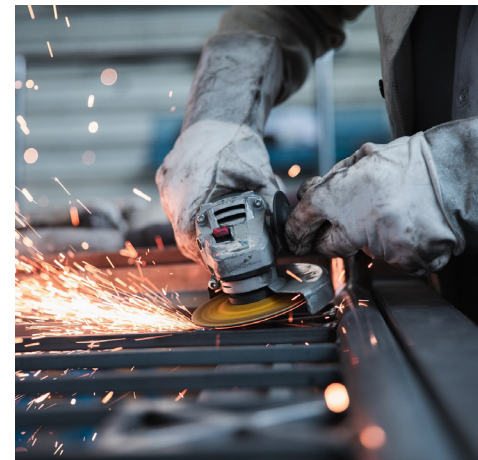

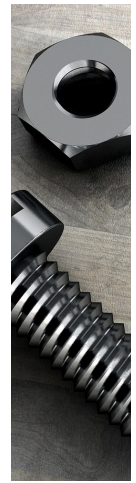

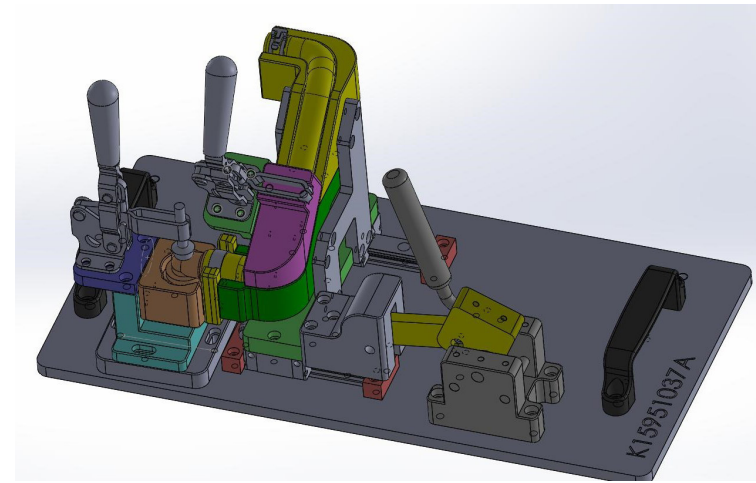

We weld and assemble elements used for production, e.g. tables, cabinets, desks, trolleys, machine structures, bases for electronic equipment. We connect welded elements with other materials such as polycarbonate, OSB boards, plastics and other materials. We also make conveyors and production stations. For construction, we use technologies of HI-WIN, IGUS, SMC companies, BOSCH profiles, roller systems, pipe systems and others. We weld using the following methods: MIG, MAG, TIG, MMA. We also have a welding machine for bars and sheets, which allows us to make meshes and fence systems.

Cooperation

We use our own resources and we also cooperate with other companies providing the following services:

- heat treatment,
- galvanization and application of wear-resistant coatings,
- sheet rolling,
- bending sheets, rods, pipes, profiles,
- powder coating,
- plastic welding,
- 3D printing,
- laser cutting.

Cooperation

We create solutions for companies in the following industries:

- automotive,
- food,
- plastic packaging ,
- mining,
- medical,
- fittings,
- heat engineering.

Our products are used in factories in European Union, USA, China and Morocco.
