

ENKATEK – THE POWER OF PRECISION

"Reliable Production, Agile Organization, Young Team."

About Us

Founded in 2021, Enkatek is a machining workshop specialized in repetitive production projects with advanced multi-axis machining capabilities.

Our Core Expertise

Initially established with a focus on plastic injection molds, we quickly shifted our direction towards serial production and custom part manufacturing in response to the increasing demand in these areas.

Material and Supply Capabilities

We have the competence and experience to machine engineering metals such as aluminum, steel, stainless steel, titanium, copper, brass, and bronze with precise tolerances.

We collaborate with approved and reliable partners for custom hot/cold bar drawing and heat treatment processes, tailored to the specific needs of each order.

Process Intelligence

For high-quantity production runs, we develop our own clamping systems and fixtures.

This allows us to reduce production time, enhance quality, and ensure high consistency in repeatable manufacturing processes.

Surface Quality

We place great importance on surface finish. By using polishing and vibratory deburring machines, we remove burrs, minimize tool marks, and achieve smooth, clean surfaces—both technically and visually.

Quality Documentation

Each shipment is accompanied by a documentation set that includes the material certificate, measurement report, material data sheet, and ballooned technical drawing. All parts are carefully packaged in our custom boxes to ensure they are protected from damage during transportation.

Training & Workforce Development

We recruit our team members primarily from apprenticeship programs and vocational school internships, and train them in-house. This approach not only builds a sustainable team culture but also fosters a strong sense of belonging within our workforce.

Agile Organization

Our decision-making and execution processes are fast; we can quickly adapt to sudden changes in production planning. During peak workload periods, we remain flexible with overtime, allowing us to save our customers valuable time. What makes all of this possible is a young, dedicated team that truly believes in the value of production.

Our Vision

"At Enkatek, the only boss is the customer. Everything we do is to earn not just a one-time order—but ongoing trust."
