

Partner Of Excellence, from production to delivery of finished goods.

Who We Are:

CMS Meccanica Tonon SRL is a family-run company specializing in high-precision mechanical

Founded in the 1980s by Silvano Tonon—who patented and mass-produced a pioneering silo-cleaning tool—CMS has grown steadily, driven by a passion for precision mechanics. That same passion lives on today through his son, Massimo Tonon, who serves as both Production and Sales Manager.

President and founder Silvano Tonon continues to guide the company alongside key family members: Chiara Tonon, Purchasing Manager; and Federica Visentin,

Administrative and Safety Manager. The areas of Technical Sales, Engineering, Process Improvement, and Cost Management are overseen by Claudio Masutti.

Our production team consists of 25 young and talented mechanical "artists"—with an average age of 32—who share our deep passion

for mechanics and craftsmanship. Each piece they create reflects the care, precision, and innovation that define CMS.

Partner Of Excellence, from production to delivery of finished goods.

Products:

Our core business is special single parts, or limited runs of 20-30 pcs, maximum range is 5,000-10,000 pcs.

Our machine park allows us to be autonomous on practically all mechanical machining operations, from turning d=70mm with resumption up to d=450mm to milling with 5-axis machining centres the maximum machinable dimensions of our products are 3000x1000x1000mm, Wire and Tuff EDM machines that allow us to to create parts with special requirements.

 $Throughout \ our \ history \ CMS \ has \ produced \ many \ different \ types \ of \ parts \ from \ many \ different \ materials.$

Most of our products are unique pieces created in collaboration with the R&D of historic and important companies universities in northern Italy such as the University of Padua.

Partner Of Excellence, from production to delivery of finished goods.

Service:

CONSULTING & DESIGN

PURCHASING RAW MATERIAL

LASER MARKING

ORDER MANAGEMENT

SURFACE TREATMENTS

CLEAN ROOM ASSEBLY

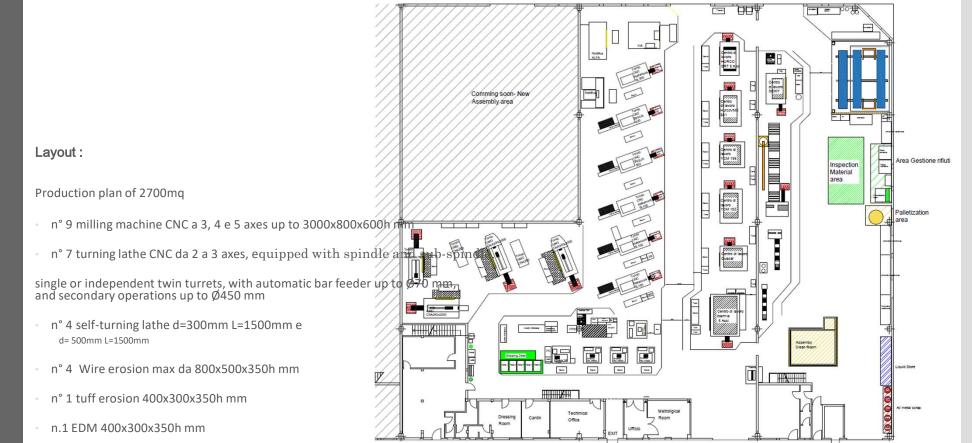

TERMAL TREATMENTS

SPECIFIC PACKAGING

Partner Of Excellence, from production to delivery of finished goods.

- n°2 rettifiche
- n°1 ZEISS Contura 2 temperature- and humidity-controlled the quality control metrology room.
- N.1 Clean Room ISO7

Partner Of Excellence, from production to delivery of finished goods.

Reference:

CMS Meccanica Tonon S.r.I manages around 200 customers worldwide.

Sectors range from the creation of special parts for OIL&GAS, AUTOMOTIVE, AUTOMATION, NAVY, FOOD, PACKAGING, PHARMA,

80% of our turnover is foreign, our customers' countries are Germany, Switzerland, Austria, France, Northern Europe, US and

Eastern Europe. For some industrial groups, we are the reference for the R&D department, we have achieved a non compliance

rate of less than 0.02%.

A very good result as a result of our very stringent quality process with stringent quality process with the use of advanced control equipment,

such as the ZEISS CONTURA 2 Quality Control room, testifying to advanced professionalism.

We work in Free Pass with a number of customers, and our efforts have been recognised through the award of the Best Supplier

of the Year prize. We are collaborating with the European Research Centre in Geneva on the creation and assembly of specific equipment and with

the sports racing management sector of the most famous Italian brand.

Market:

Our company has always based its business and technical DNA on the variety of customers and types of parts produced.

We can divide our Core Business into four major Families :

Automation:

Automation is the most important market for us. Some of our customers produce automated lines to customer specifications,

Our goal is to delivery the order material within the timeframe defined with the customer .

Oil & Gas:

The Oil & Gas sector is constantly growing, and our company has solid experience in this field.

We collaborate with major companies in the sector, produce special bushings for thermal or nuclear power plants/plants, some engine parts for shins

Research and Development (R&D):

Thanks to more than 40 years of experience, we work closely for some large industrial groups on the production of prototypes, in the field of

Precision Lenses and Automotive sports racing sector.

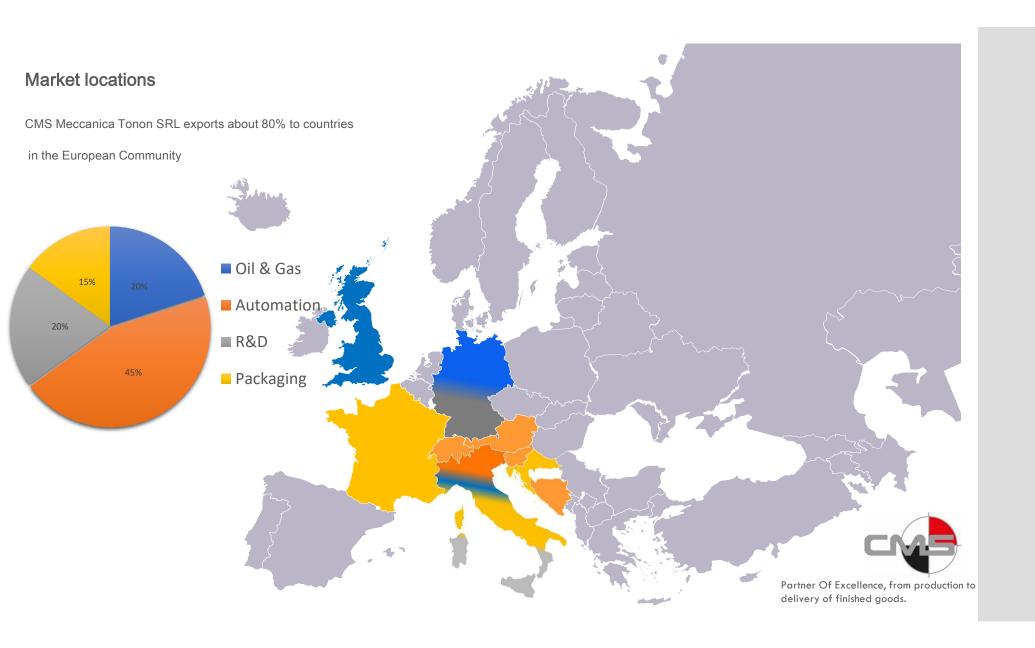

Packaging:

The packaging sector, similar in part to the automation sector, ranges from the special construction of packaging islands, gripper hands

grippers for robots, parts for bottling lines.

Partner Of Excellence, from production to delivery of finished goods.

Green think:

Our certifications:

- / ISO 9001
- / ISO 9100 under validation
- ✓ ISO 14001 in the process of validation
- MOKA started feasibility study for certification
- 120 kW solar panel system on the entire roof of the factory.
- Use of recyclable materials e.g. adhesive tape made of paper material paper,
- 4.0 technology on 90% of the machine tools.
- ✓ All lighting is low consumption LED type.
- ✓ Started separate waste collection process in production and offices.

Partner Of Excellence, from production to delivery of finished goods.
