OUR EXPERIENCE

At Hyperset, we have been specializing in industrial automation and robotics for many years, and offer comprehensive services for the following sectors: automotive, aviation, pharmacy, logistics, metallurgy, and the food industry. We support the largest Polish and international companies. The scope of our business includes: design and project management; production and commissioning of automation systems and robotic production lines; creation of electrical and pneumatic documentation and control cabinets.

If you decide to work with us, we provide comprehensive customer service from the beginning to the end of the process, in accordance with your expectations. We provide support at every stage of project implementation, from needs analysis, through design, production and commissioning of systems, to their servicing. The Hyperset team is a group of experienced engineers, designers, technicians and programmers who are constantly improving their skills in order to provide customers with top-quality services. Our solutions boast high quality and reliability, which, combined with the use of state-of-the-art technologies, guarantees optimal results in manufacturing

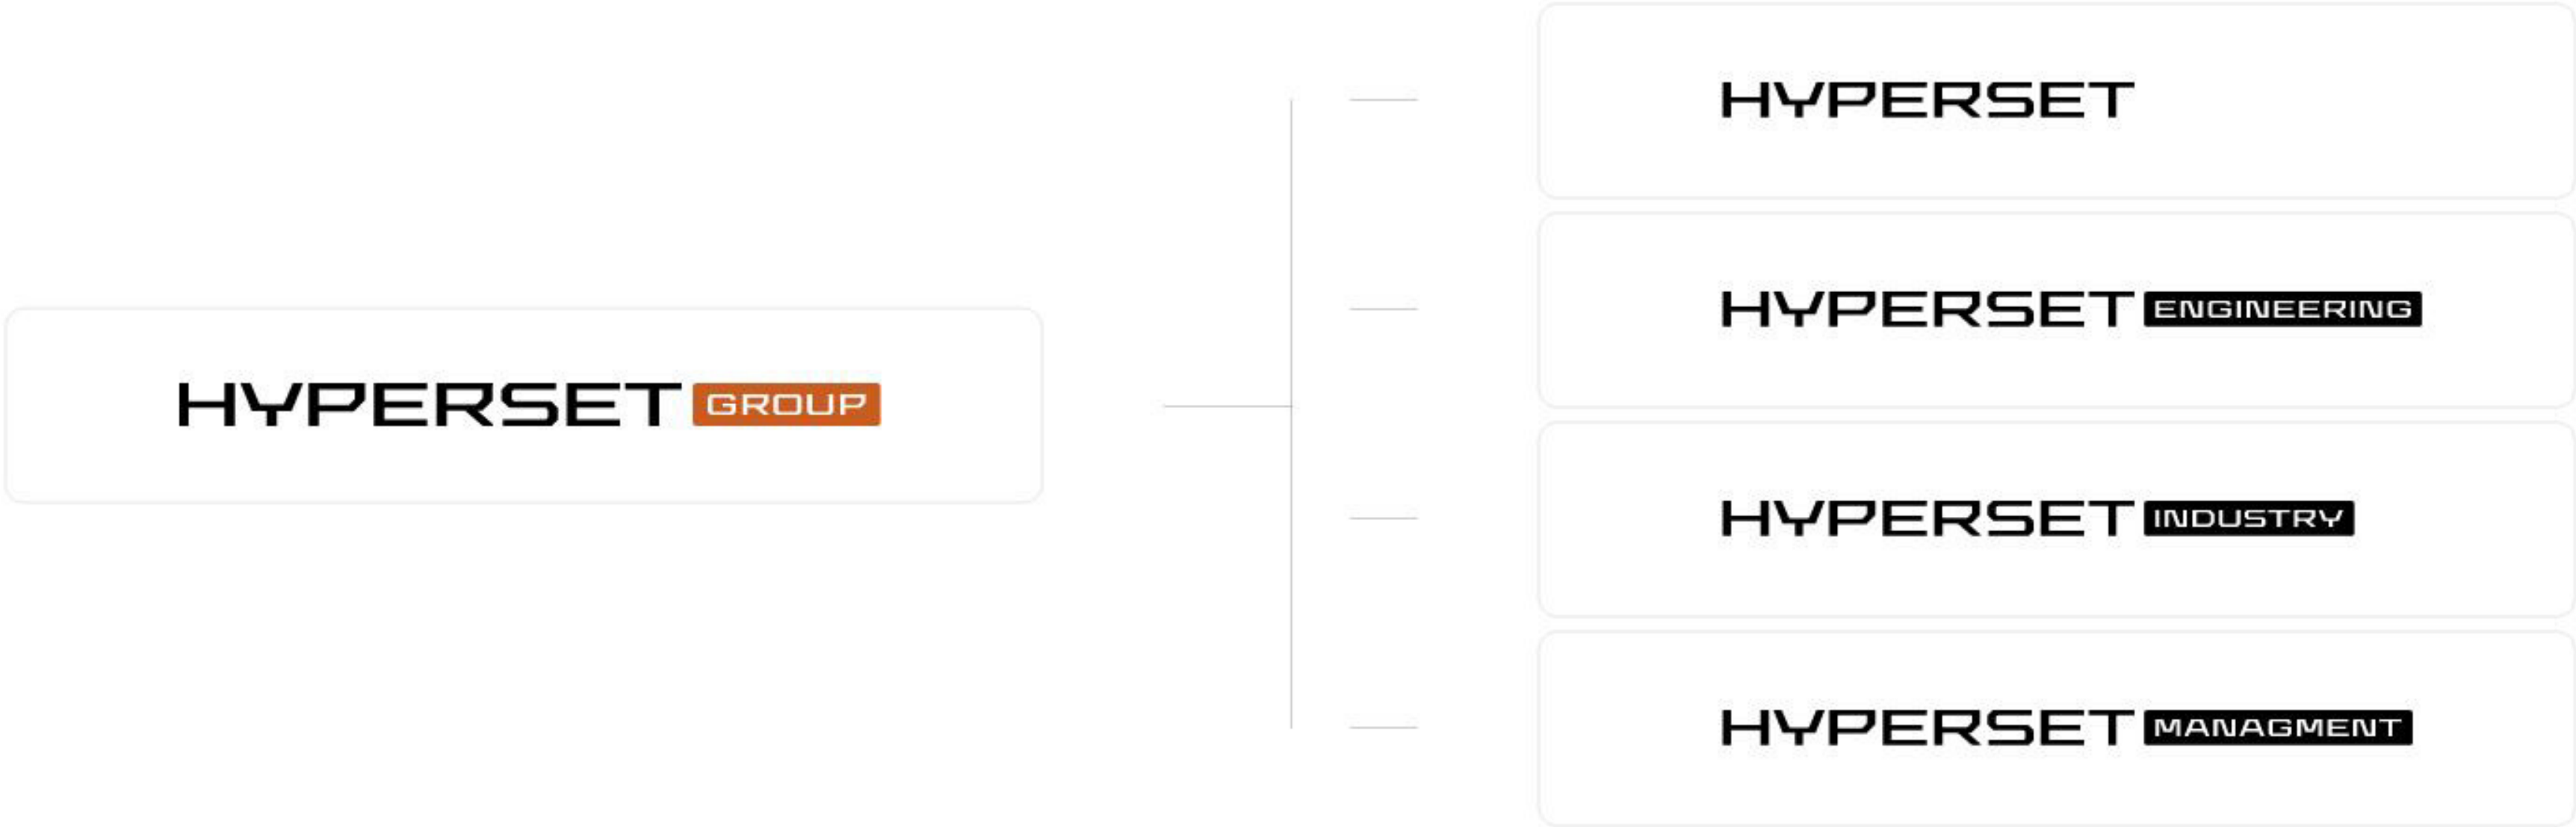

TIMELINE

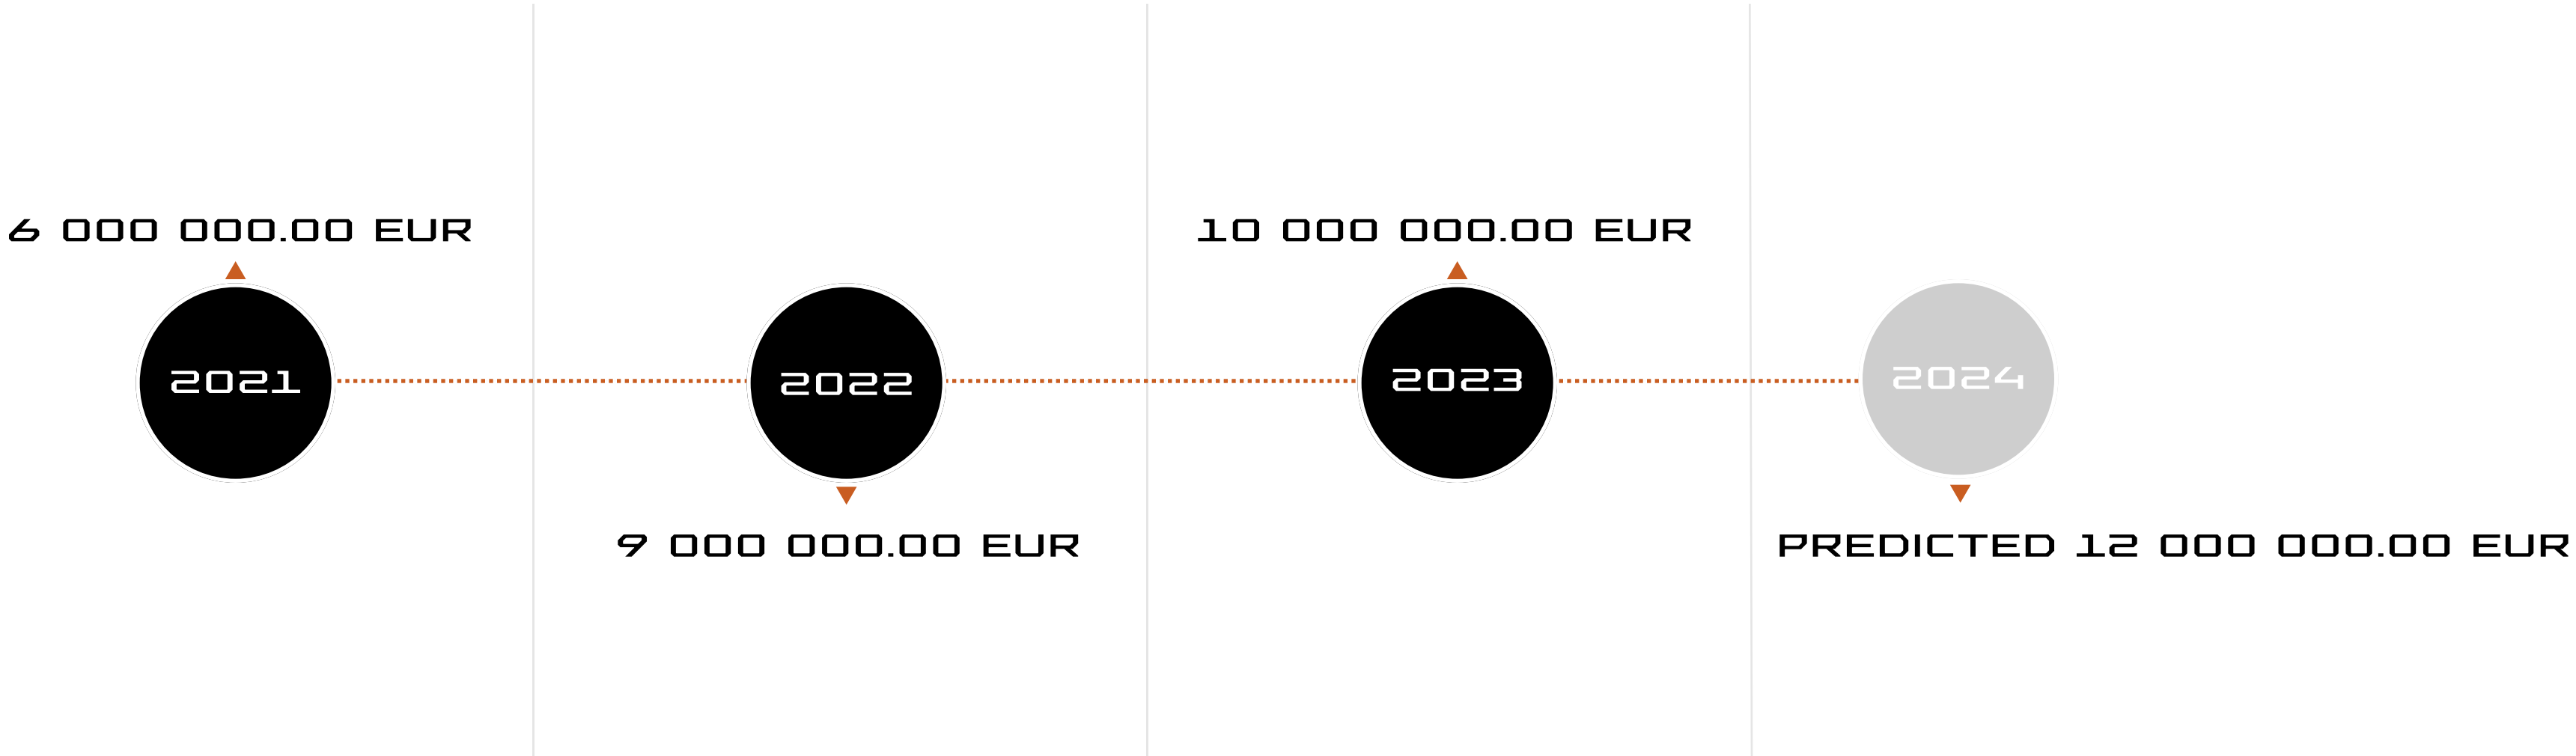

HYPERSET GROUP

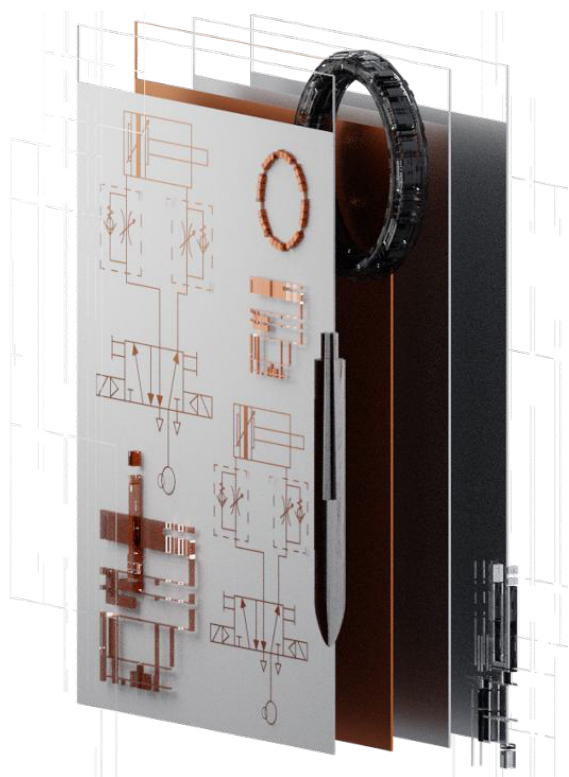

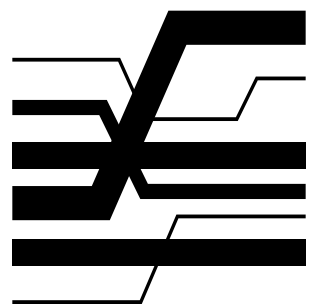

Hyperset to a term referring to 5 interrelated companies that complement each other's competencies and collaborate to achieve the best results.

DESIGN

We specialize in the design and implementation of innovative technological solutions, with a major focus on the industrial sector. Our company designs complex manufacturing cells and industrial tools for machines and processes, based on the standards and suggestions of our customers and with the implementation of proprietary solutions. In our work, we combine the traditional approach to design with the most advanced technologies available on the market.

We also offer services such as the design of electrical and pneumatic documentation for automation systems and the modification of existing documentation. As part of our offer, we also design control cabinets.

- **Design Of Electrical Schematics**
- **Design Of Pneumatic Schematics**
- **Design Of Electrical Cabinets**
- **Design Of Machinery And Equipment**
- **Design Of Steel Construction**

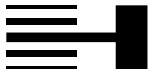

PROGRAMMING

As part of our services, we offer the programming of PLC drivers based on the client's standards, including the implementation of proprietary solutions tailored to the individual needs of the project.

Our company specializes in programming Allen Bradley and Siemens controllers. We also offer programming services for industrial robots from manufacturers such as KUKA, FANUC or ABB. We program both individual robots and distributed robotic cells.

- Offline PLC Programming
- Online PLC Programming
- Offline Robot Programming
- Online Robot Programming

ASSEMBLY

Electrical installations are integral to the operation of most industrial machines and equipment used today. With this in mind, at Hyperset we carry out electrical, mechanical and pneumatic installations for the industry.

We perform professional low and high voltage installations, lighting installations, and industrial automation installations.

We provide a comprehensive service package: starting from the design, through 3D measurements (laser, three-dimensional scanning, numerical analysis), all the way to professional execution.

- **Electrical Installation**
- **Mechanical Installation**
- **Pneumatic Installation**
- **Relocations**
- **Maintenance**
- **3D Measurements**

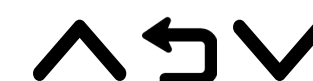

04

PRODUCTION

We provide comprehensive services for industry manufacturing. We have been present on the market for many years, so we have gathered the necessary experience and knowledge in the field of production and implementation of advanced technological solutions.

- Prefabrication Of Electrical Cabinets
- Prefabrication Of Operator Panels
- Production Of Machinery And Equipment
- Production Of Steel Structures
- Production Of Aluminium Structures
- Industrial Printing
