

The Jansen logo is displayed in a bold, blue, sans-serif font. The background of the slide features a low-angle photograph of a modern building with a glass and metal facade, overlaid with a white geometric pattern of intersecting lines forming triangles. The image is framed by blue and white geometric shapes.

JANSEN

We are Jansen

Our History

Family Business since 1923

Founded in 1923 by
Josef Jansen

1930 Steel Tube
1946 Steel Profile Systems
1955 Plastic Extrusion

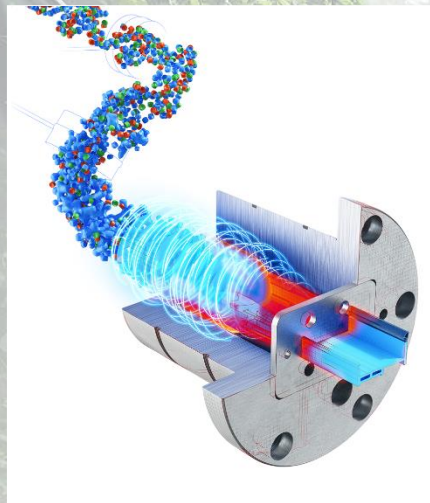

The family business has been
run by Priska and Christoph
Jansen, the third generation
since 2003

2021: Strategic realignment
with focus core segment
«construction industry»

Product Segments

Plasti Profiles

- Plastic Profile Pipes
- Extruded profiles
- Special Hoses

Water Management

- Drainage Systems
- Sanitary & Heating
- Supply Systems
- Rainwater Management

Geothermal Systems

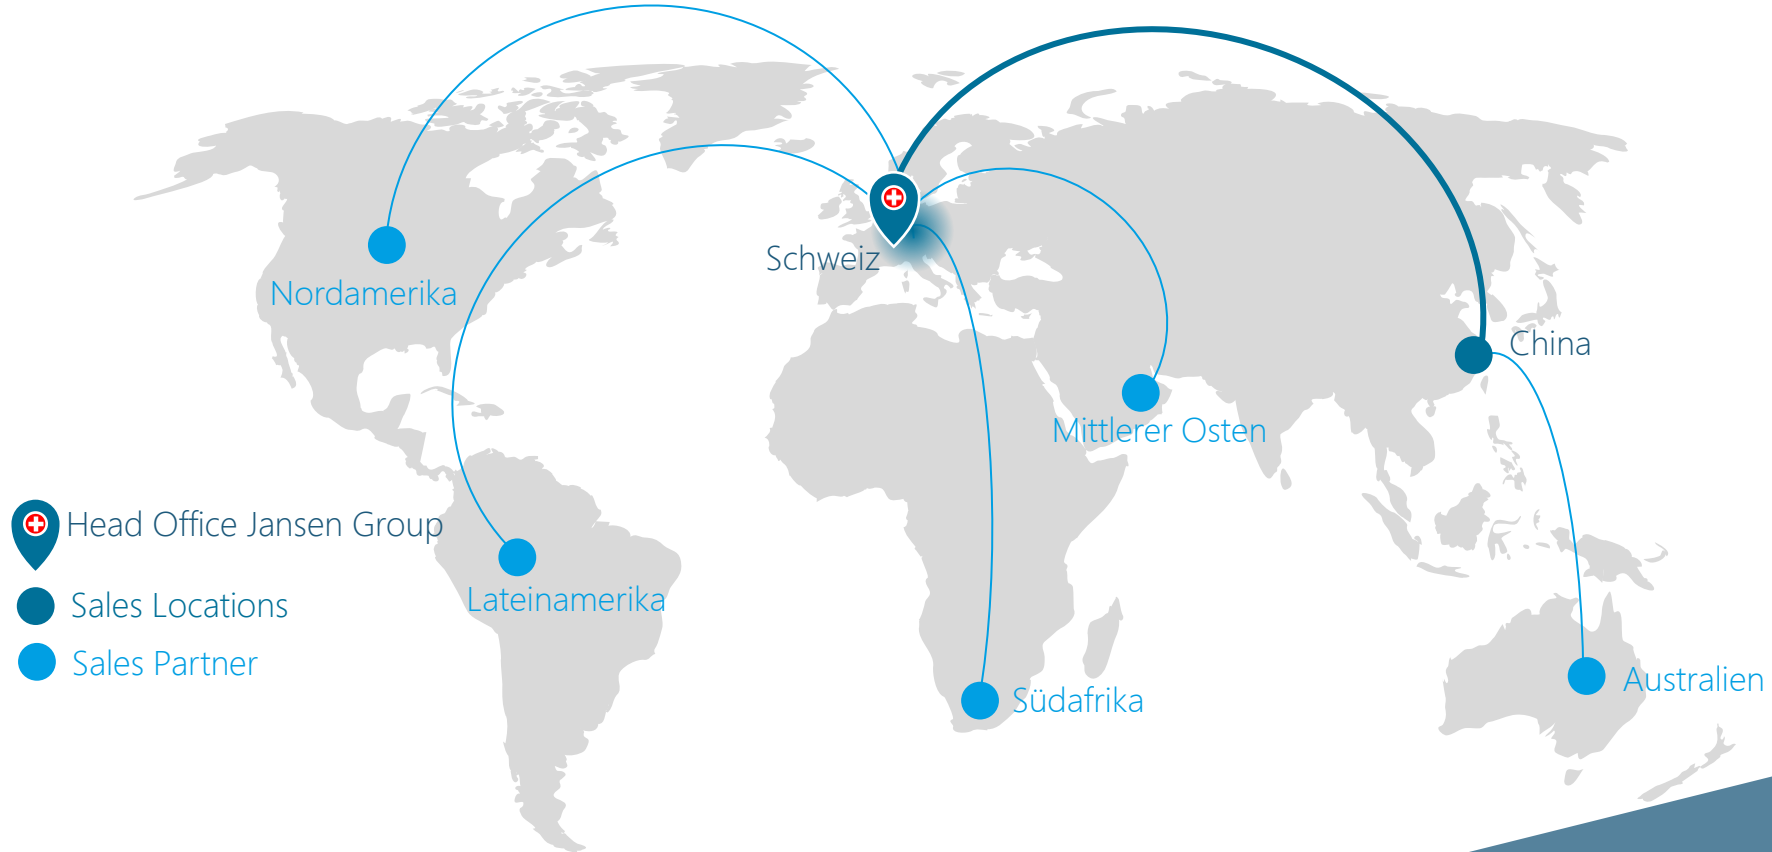

- Geothermal probes
- Collector Systems

Jansen Steel Systems

- Window Elements
- Facade Elements
- Door Elements

Distribution Network

Plastic Profiles

Expert Since 1955

JANSEN

Plastic Profiles

We offer customized plastic profiles for following industries, among others:

Industry

Building

Sanitary

Sample Products

Profile Tube

as power-transmitting
element for industrial
electric devices

Edge Rail Profile

Replaces the setting of
kerbstones with concrete
and thus shortens the
processing time

Ladder Rail

Component of a complete
plastic ladder with drinking
water approval

Our services in detail for you:

Individual plastic profiles

made of thermoplastic material

- Plastic profiles made to measure
- Individual plastic profile pipes
- Special hoses
- Extruded profiles according to specification
- Profile extrusion
- Multi-material extrusion
- Coextrusion

Product development

for exceptional requirements

- Project conception
- Consulting and analysis
- Simulation and calculation
- Development of special plastics
- High strength and highly filled plastics
- Thermally conductive plastics
- Sustainability check for existing profiles
