FROM THE IDEA TO A FINAL PRODUCT

OWNER'S MESSAGE

We are the next generation of TIPS family business with more than 50 years of proven track record and tradition in metalworking. Today we employ around 50 people who have the competencies needed to accomplish everything from the initial idea to the final product.

TIPS MTC's core business is the metalworking of various shapes and materials. With **quality, traceability, and flexibility in materials and production**, we strive to serve each customer's wishes and requirements at our best.

WHY CHOOSE US

Are you in need of quality metal development and processing by cutting, punching, bending, welding and surface protection?

The TIPS MTC is an **experienced, reliable, and stable partner that supports you throughout the value chain.** In addition, you can benefit from the final product assembly, adding additional material, including electricals, packing, and shipping to the desired address.

If this sounds like a company that understands your side of the business, is set up to support you and will take your needs seriously, then please **contact us.**

SERVICES

**YOUR GOAL, OUR SOLUTION,
YOUR SUCCESS!**

LASER CUTTING

The modern and powerful TRUMPF laser cutting machine can cut up to 25 mm sheet metal with a power of 6000 W on a workbench of 1500 x 3000 mm.

BENDING & SHEET METAL CUTTING

Bending service or sheet metal curvature is performed on computer-supported CNC bending machines that provide exceptional accuracy.

PUNCHING

Quality and robust construction, modern software, and a wide range of tools are the features of our TRUMPF punching machine with a workbench of 1250 x 2500 mm.

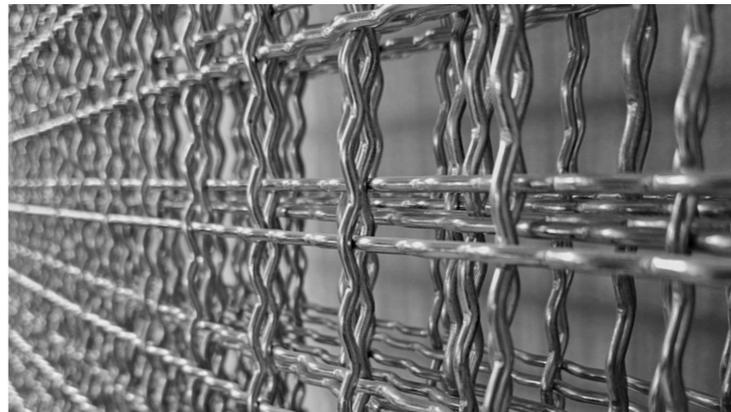

SURFACE PROTECTION

No matter if you take advantage of the new state-of-the-art Powder-coating line or get your products protected in another way, you can be sure that you get the best.

- wet varnishing
- hot-dip galvanizing
- galvanic galvanizing
- anodizing

WELDING

We weld steel, stainless steel and aluminum based on MAG / MIG and TIG technologies. Our welders are certified under the welding standard ISO EN 9606. We hold certificates EN 1090-1 and ISO 3834-3

WOVEN WIRE

Specialized in woven wire mesh production, using bright drawn, galvanized, stainless, or aluminium wire. Among others can be used for numerous applications including warehouse partitions, equipment safeguards, different protection and security measures, ie. biking companies, heat pumps, solar panels, and many more.

ASSEMBLY

Assembly team will secure mechanical and electrical assembly. Electrical assembly includes wiring, marking, and assembly of individual electrical components in electrical cabinets. Mechanical assembly includes pneumatic and basic mechanical assembly. The assembled items are packed accordingly for your collection or delivered to the desired location. If in need, we provide quality control reports.
