# We are TANAX TRUCKS

We are TANAX TRUCKS – a Slovak company based in Banovce nad Bebravou, which for decades now has focused on heavy machinery production. The history of heavy-machinery production of Tanax Trucks and its predecessors dates back to 1953.

Within our civil and commercial manufacturing section we produce custom welding solutions tailored to meet our customer's unique needs from design to production, with the use of in-house engineers, constructers and 3D designers. Apart from the commercial market, we have moved to working with the Slovak government by delivering custom container solutions to the Slovak rescue squad.

With a team of highly skilled and experienced welders, we combine precision craftsmanship with cutting-edge robotic technology to provide you with the highest quality welding services.

We have also worked with the Slovak government and Ministry of Defence for over two decades across various military projects.

## Custom Projects, Exclusive Execution.

# Our Technologies

Our commitment to quality and precision ensures that every container we create is built to meet rigorous standards.

Our cutting-edge Daihen FD-B6L robotic welding stations with a 14m track deliver precise and high-quality welding for containers, ensuring accuracy across 6 axes.

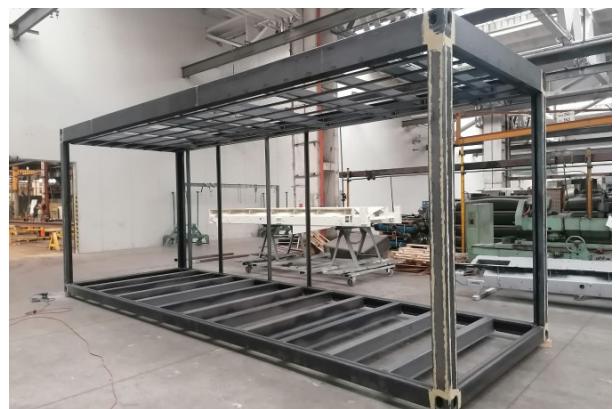

# Applications

## CONSTRUCTION & INDUSTRY

## LOCAL AUTHORITY

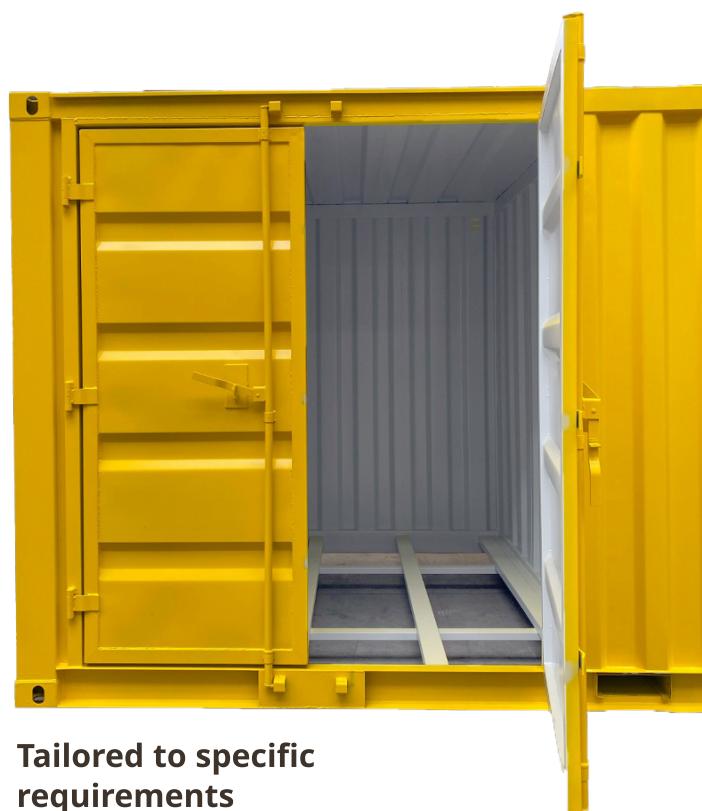

## EVENTS

# Storage Containers

One of the company's main focuses is crafting custom-sized and purpose-specific storage containers to cater to a wide range of needs. Whether you require containers for residential, office purposes, industrial applications, or any other special custom containers, we have the expertise to deliver precisely what our customers need.

# Certified in Temperature Testing

Tanax Trucks has recently obtained a technical certificate. This certificate outlines the results of temperature tests performed on a container from Tanax Trucks, identified as CST - W00 - 000. Specifically, this container was subjected to two primary tests:

## Cooling to -30°C

All functions, including door mechanisms, window latches and the Camlock DNSS system, were fully operational. Air temperature inside the container was recorded at two different points: 10.5°C and 15.3°C, with the electrical heater activated.

## Heating to +50°C

The same functions were tested at +50°C and confirmed to be fully operational.

## **CST – A06 to A07 Series Containers Certified**

---

TANAX TRUCKS has also been granted an Approval Certificate for its containers, from CST – A06 – 000 to CST – A07 – 000, ensuring compliance with the necessary standards and regulations for certification, encompassing both production and repair processes.
